

Simplify Calero PINNACLE Upgrades, Eliminate Requirements for Technical Staff

THE CALERO PINNACLE LICENSED HOSTING SAAS SOLUTION

You want the latest that PINNACLE has to offer, but don't have the technical staff to maintain the upgrade or database server resources to expand? No problem! Calero can host your entire PINNACLE solution within our Software as a Service (SaaS) environment. Not only will you have access to the latest enhancements such as the expanded Service Desk features and InSight Analytics, the responsibility of performing the upgrade steps are handled by the Calero subject matter experts. No more challenges with securing technical staff to help with upgrade releases. It's a great way to leverage the PINNACLE software license rights you already own.

KEY BENEFITS

- Eliminate the need to find/schedule in-house technical staff for upgrades, that's what we're here for
- Make it easier to move to Oracle Database 12.1.0.2 from previous versions
- Remove the requirement to have costly servers or IT infrastructure in-house
- Easily move to the latest version, with the newest functionality
- Provide predictable costs and lower total costs of ownership, enabling the reallocation of resources to grow business

IMMEDIATE GAINS: MOVING TO CALERO PINNACLE 6.7.0 SP1

By moving to the Calero PINNACLE licensed hosting SaaS solution, you will realize immediate benefits that are embedded within our latest release.

- Gain immediate efficiencies and mitigate compliance issues by moving to the latest Oracle Database 12.1.0.2
- Add the additional visibility and analytical transparency gained with the newly released Calero InSight Analytics solution, which is now embedded directly into the Calero PINNACLE solution (Receive updates regarding new dashboards and analytics as they become available. Available as of 6.5.2 SP1.)
- Have the ability to leverage the Service Desk module, which allows you to help manage SLA tracking, incidents and service requests (Available as of 6.5.1)
- And more ...

Moving to a licensed hosting SaaS environment makes all the sense in the world for organizations that are interested in keeping things simple. Whether you're on our latest release, or on a previous version, you have the ability to make the move. And we're here to help.
