

SOLUTION SHEET

Simplify SaaS Management

Gain complete visibility and control over your organization's software applications and licenses with a comprehensive SaaS management platform.

► Discover Applications

- Connect directly to identity and SSO providers to get a complete list of your SaaS applications
- Utilize Smart Automation to capture spend directly from your vendor invoices
- Identify shadow IT and uncover applications that pose a threat to your IT security

► Manage Licenses

- Unlock real-time license, usage, and plan data
- Tame sprawl by identifying duplicate and low usage licenses
- Visualize your inventory to reallocate unused licenses and consolidate applications

► Optimize Spend

- Understand usage analytics to right-size your SaaS contracts
- Automate invoice processing to ensure timely and accurate payments
- Allocate expenses to ensure appropriate department charge-backs

► Unlock Complete SaaS Optimization

API Integrations

Gain real-time insights into your software assets with automated discovery and detailed user & usage information.

Inventory Management

Ensure better resource allocation with advanced license, usage, and cost tracking.

Contract Management

Maximize ROI and optimize your contracts with comprehensive price assessment and analytics tools.

Expense Audit and Validation

Streamline expense auditing and ensure accurate financial reporting through cost validation.

Granular Insights

Drive smarter decision making with deep data analytics that uncover usage trends and cost savings opportunities.

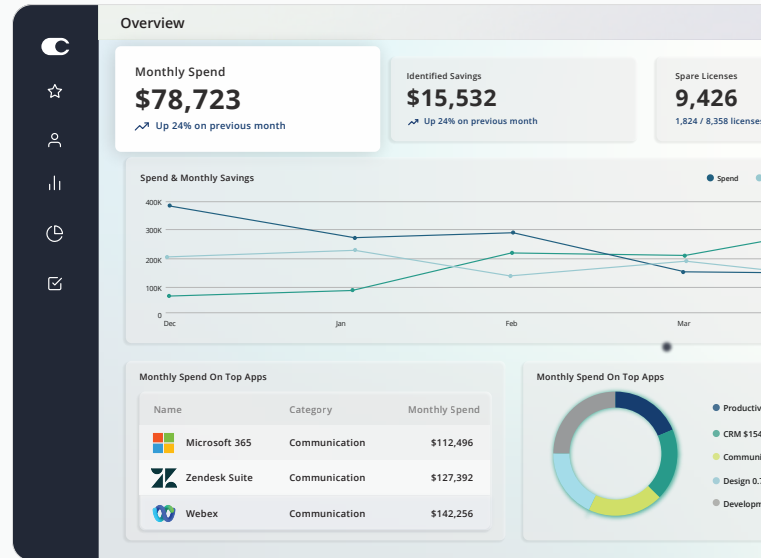

Program Management

Enhance program management by tracking and allocating costs through HRIS integrations that allow seamless policy management.

► Powerful Analytics

Leverage Calero’s all-in-one platform to manage your telecom and technology spend, harness rich data and usage patterns, and create customizable, self-service analytics dashboards for actionable insights.

- Gain insight into monthly spend, detect waste, and identify duplicate applications
- Evaluate the impact of policy and waste reduction changes
- Isolate, identify, and analyze utilization by department to allocate costs appropriately

► Why Calero

Increase efficiency and savings with a partner that provides the fastest time to value managed technology solution on the market. See why we are trusted to manage over \$25 billion in technology spend by more than 3,000 clients across the globe.

Continued Innovation

We continually reinvest resources to offer the best managed technology solution to our customers.

Complete Lifecycle Management

We are committed to giving you complete technology lifecycle management so that you can fully optimize your estate throughout your entire digital transformation process.

Unmatched Global Support

Manage technology with confidence knowing you have the support of an in-house team of experts to help you.

“Our whole network is becoming driven towards enabling cloud applications, and this allows us to manage those applications more closely.”

-Avery Dennison
