

IT Billing for Cloud Usage

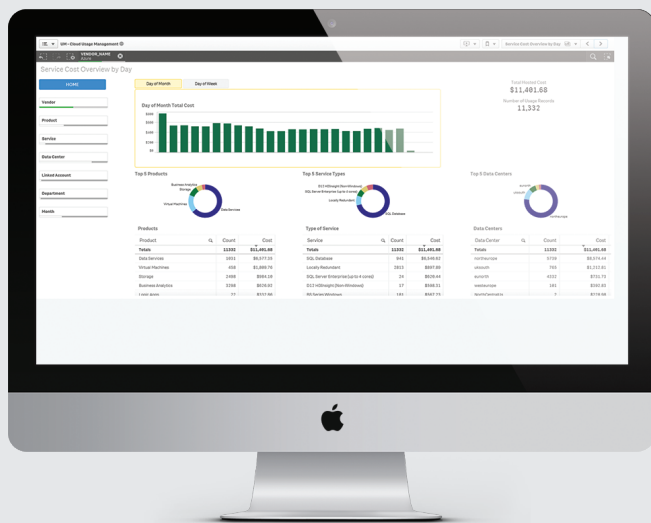

Charge-back centrally-billed cloud expenses in a concise consolidated bill

Looking to take advantage of the volume and commitment discounts available from your cloud service providers, but don't have a way to intuitively manage charge-backs and achieve the visibility necessary for your department heads? Introducing IT Billing for Cloud Usage on Calero PINNACLE 7.3.

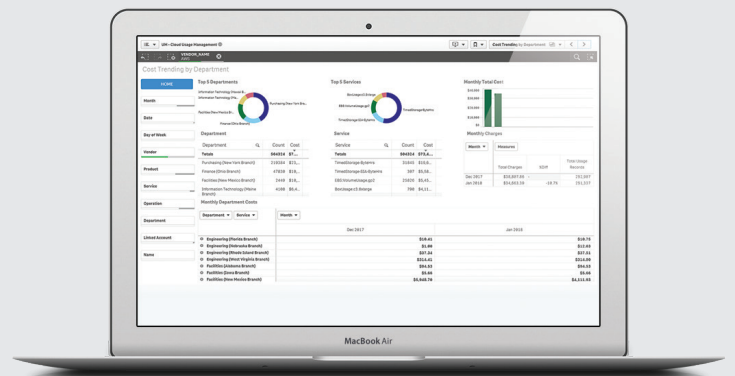

Managing Cloud Service billing in an environment where you don't have control over the purchases, but are required to pay for them, can put you in a precarious position. Being able to accurately charge-back based on actual usage is imperative, but so is enabling your internal stakeholders with visibility and control.

IT Billing for Cloud Usage Benefits:

- Reliably charge-back internal stakeholders based on actual usage
- Unify visibility into multiple cloud service provider invoices in one consolidated bill
- Develop best practices across all cloud expenses, and enable the IT team to be true advisors to the business

- Analyze and track cloud usage and identify opportunities for savings via analytics that aggregate patterns and usage trends across all cloud providers used within your organization

- Create the full departmental billing picture, by creating cloud invoice visibility right alongside all IT / Telecom charges
