

Augmented Intelligence at Calero

The AI innovations and enhancements in our platform augment your team's ability to be more agile, enabling you to work efficiently and streamline productivity so you have more time to focus on strategic priorities.

We are committed to being:

- 1 Responsible** — Developing AI with care and control
- 2 Secure** — Ensure data safety and protection
- 3 Ethical** — Empower people instead of replacing them
- 4 Impactful** — Drive productivity and better decision making

AI with Purpose

With every automated activity, we provide actionable insights, stream-line error-prone manual tasks, and accelerate time to productivity within the platform.

AI is embedded within the Calero solution to serve three main areas:

Visibility

Provide reliable data for informed business decisions through expanding analysis, insights, and awareness across your entire technology estate

Control

Enhancing actionability and governance across your technology estate to increase maturity over technology assets

Optimization

Increase productivity by maximizing the value of your investments while making the most of your time and resources and eliminating manual tasks

Security-First Commitment

We are committed to maintaining the highest level of security for all customers. With responsible innovation at the forefront, we include several strict guardrails for AI including:

- **Data Sovereignty:** Calero does not use customer data to train general models
- **Privacy by Design:** AI features are built utilizing zero-trust architecture and end-to-end encryption
- **Content Safety Controls:** Controls including Prompt Injection, Bias, Groundedness, and Protected Material
- **Audit Trails:** Transparency in how AI processes your information and inquiries
- **Compliance-Ready and Focused:** ISO27001, SOC 2, and GDPR compliance built into every feature

Driving Success with Artificial **Augmented Intelligence**

By embedding automation and intelligence into our Unified Technology Management platform, we help IT Leaders effectively manage expenses, inventory, and operations—**without losing the human expertise that drives success.**
